Objective

Frontend-focused Computer Engineering student skilled in React.js, JavaScript, and Tailwind CSS. GSSoC Campus Ambassador with a passion for building clean, responsive UIs and contributing to tech communities. Seeking a frontend internship to apply and grow my skills in a collaborative environment. I am a passionate Computer Engineering student proficient in HTML, CSS, React, Node.js, and MongoDB. I am eager to join a dynamic team as a web development intern to create impactful applications and grow as a full-stack developer in a tech-driven environment.

Education

	A.G. PATIL INSTITUTE OF TECHNOLOGY, SOLAPUR B- Tech [Computer Engineering]	08/2022 - 05/2026
	D.B.F Dayanand College Of Arts And Science Solapur Senior Secondary (XII)	Solapur 06/2022 - 06/2022
	P.S. English Medium Technical High School Solapur Secondary (X)	Solapur 06/2020 - 06/2020

Skills

HTML5 • CSS3 • TypeScript • React.js • Tailwind CSS • GitHub • C Programming • SQL • Team Collaboration • Leadership • Communication Skills • Problem Solving • Creativity & Innovation • Presentation Skills

Projects

AI Based Early Disaster Warning System

<https://github.com/aryanmaske052005/Lex-Ai--The-Research-Engine-For-Court>

A frontend-only simulation project that showcases real-time disaster alerts using AI concepts. Built with TypeScript, React (Next.js), and Tailwind CSS the system simulates earthquake, wildfire, and tsunami warnings without a backend. It features a responsive UI with real-time monitoring, an interactive dashboard, and modular TypeScript code with strong type safety. Designed to demonstrate how AI can visually assist in disaster preparedness, this project reflects my skills in frontend engineering, UI/UX design, and scalable architecture – all while addressing a critical real-world problem.

AI Driven Research Engine for Commercial Courts

<https://github.com/aryanmaske052005/Lex-Ai--The-Research-Engine-For-Court>

Tech Stack: React, TypeScript, TailwindCSS

Developed a legal research assistant designed to streamline case analysis and legal document search for court professionals and students. Lex-AI simulates AI-driven responses to legal queries, offering relevant case summaries, precedents, and document insights. Built with a clean, modular frontend using React and TailwindCSS, it provides an intuitive and responsive UI. This project demonstrates how AI can enhance the speed and accuracy of legal research, bridging technology and the judiciary domain.

CODE CLUB WEBSITE

<https://github.com/aryanmaske052005/CodeClubAGPIT>

Tech Stack: React, Next.js, TailwindCSS, Framer Motion

Developed a fully responsive website for Code Club AGPIT to showcase club activities, events, team members, and gallery. Implemented smooth scroll-based navigation, animated transitions using Framer Motion, and modular component architecture. The site highlights initiatives like AGTechathon, fosters community engagement, and promotes upcoming events. Hosted on GitHub and deployed via Vercel for seamless CI/CD.

Key Achievements

- | | | |
|--|---|--|
|  Campus Ambassador
Took initiative as a GSSoC Campus Ambassador and Core Member of Code Club AGPIT, leading event planning, tech workshops, and promoting open-source engagement among peers. |  Runner Up in Techfest
I have secured runner up prize at AG tech Fest Solapur. for Paper Presentation
Event Topic : IOT |  Your Achievement
Participated in India's premier national-level innovation challenge, contributing to idea generation and prototype design |
|  Aptitude Training Program
Successfully completed a 1-week aptitude skills training, strengthening logical reasoning and problem-solving capabilities |  Soft Skills Training Program
Completed a certified 4-day workshop on communication, teamwork, and personal development. |  C Programming Internship – APT TECH
Completed a structured internship to strengthen foundational programming concepts in C language. |
