SUMMARY

Motivated Computer Engineering undergraduate with hands-on experience in Java, REST API development, MySQL, and full-stack web technologies. Demonstrated ability to build scalable applications, troubleshoot complex backend issues, and deliver end-to-end software solutions following SDLC and Agile methodologies. Currently advancing Java Full Stack skills at QSpiders Pune. Seeking a Java Developer role to contribute robust, maintainable code in a fast-paced engineering team.

TECHNICAL SKILLS

Languages:	Java (Core) , Python, C
Frontend:	HTML5 , CSS3 , React.js
Backend:	Node.js, REST API Integration,
Database:	MySQL, SQL,DBMS
Tools & DevOps:	Git, GitHub, Linux (Ubuntu), CLI , Microsoft Office Suite
Networking Fundamentals:	TCP/IP Basics, Network Troubleshooting, IP Configuration
Core Concepts:	SDLC, Agile Methodology,OOP

EDUCATION

B.Tech - Computer Engineering	A.G. Patil Institute of Technology (DBATU), Solapur	7.8cgpa	2022 – July 2026
ClassXII - General Science	D .B. F Dayanand College of Arts and Science, Solapur		2020 – July 2022
Class X - - (SSC)	P. S. English Medium Technical High School, Solapur		2019 – July 2020

PROJECTS

Lex AI – AI-Based Legal Research System | Individual Project |

Python, REST API, MySQL, Full SDLC

2024

- Developed an AI-based legal research application following complete SDLC phases from requirement analysis to testing and documentation.
- Integrated REST APIs with external legal datasets and performed troubleshooting, validation, and system testing to ensure reliable application performance
- Assisted in deployment, environment setup, and configuration management during project testing phases.
- Debugged backend processing issues and improved overall research efficiency significantly.
- Supported issue diagnosis, debugging, and technical troubleshooting activities across the application lifecycle.

AuthenLedger – Digital Identity Verification System | Team Project (4 members) |

React.js (TSX), Node.js, Supabase, MySQL, REST API, Git.

- Worked on frontend-backend integration using REST APIs and validated API responses for smooth communication.
- Collaborated in developing a secure identity verification platform with authentication and doc validation
- Assisted in debugging and resolving 15+ critical issues before the production demo, improving system reliability.
- Participated in functional testing, technical documentation, and Agile sprint-based development activities.
- Used Git and GitHub for version control, issue tracking, and collaborative development.

CERTIFICATIONS & PUBLICATION

Java Full Stack Developer Program – QSpiders, Pune (In Progress)	2026
Python Programming Certification – Profound Edutech	2025
Research Paper Published: AI-Based Early Disaster Warning System – Indexed Journal	2024

ACHIEVEMENTS & LEADERSHIP

- 1st Rank – Avishkar Inter-College Technical Competition, DBATU (FY & SY)
- 2nd Runner-Up – AGPIT Tech-Fest Paper Presentation
- Mentored 200+ students as TNP Lead Coordinator at AGPIT (2023–2025)
- Community Associate – GirlScript Summer of Code (GSSoC)
- Reviewed pull requests, resolved issues, and collaborated with global contributors using Git/GitHub.
